EDUCATION

Vasavi College of Engineering | Hyderabad, India

Bachelor of Engineering in Computer Science | **Expected July 2028**

- **SGPA: 9.22 / 10.0**
- **Relevant Coursework:** Data Structures & Algorithms, Probability and Statistics, Object-Oriented Programming, Logic and Switching Theory.

TECHNICAL SKILLS

- **Languages:** C++ (Proficient), Python (Advanced), Java, JavaScript, HTML5/CSS3.
- **Developer Tools:** Git, GitHub, Linux/Unix Command Line, VS Code.
- **Areas of Interest:** Systems Programming, Generative AI, Data Science, Algorithm Optimization.

CERTIFICATIONS & AWARDS

- **Oracle Cloud Infrastructure 2025 Certified Generative AI Professional** — Demonstrated advanced proficiency in building and deploying LLM-based solutions on OCI.
- **Oracle Cloud Infrastructure 2025 Certified Data Science Professional** — Validated expertise in ML model training, evaluation, and deployment workflows.
- **Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate**
- **Oracle Cloud Infrastructure 2025 Certified Foundations Associate**
- **Oracle Data Platform 2025 Certified Foundations Associate**
- **NPTEL (IIT Madras) Top 2% — The Joy of Computing using Python** (Score: 87%); also achieved **Elite** status in Programming, Data Structures & Algorithms using Python.
- **IBM SkillsBuild — Introduction to Generative AI** (Feb 2026, 4 hrs)

EXPERIENCE

Research Intern | IIT Ropar — NPTEL Winter Internship 2025

Under Prof. Sudarshan Iyengar | Virtual | Jan 2026 – Mar 2026

- Competitively selected for a 10-week virtual research internship at **IIT Ropar** through the national NPTEL program, working on research tasks under direct faculty supervision.

TECHNICAL PROJECTS

[Dev Sage AI](#) | Full-Stack AI Developer Tool | React, Groq API, LLaMA 3.3 70B

- Built and deployed a full-stack AI-powered code analysis platform using **React** on the frontend and **LLaMA 3.3 70B** via the **Groq API** for ultra-fast LLM inference.
- Features include AI-driven **code review**, **debugging assistance**, **algorithm visualization**, and an interactive practice mode for developers.
- Leveraged Groq's inference engine for low-latency AI responses, and managed full deployment on Render for live public access.

PROJECTS & HACKATHONS

Smart Crop Selector | Smart India Hackathon (SIH)

- Developed a web-based prototype to assist farmers in selecting optimal crops based on geographic data to maximize agricultural yield.
- Integrated AI-driven logic to analyze regional soil and climate data, providing users with data-backed crop recommendations.
- Collaborated in a team environment to bridge the gap between complex data inputs and a user-friendly frontend interface.

GenAI Assistant | FutureSkills GenAI Hackathon

- Built a functional chatbot designed to provide optimized code snippets for fundamental programming logic and data structures.
- Implemented **Hugging Face** API tokens to leverage Large Language Models (LLMs) for real-time code generation.
- Utilized **Git** and **GitHub** for version control, managing code merges and resolving conflicts within a collaborative team setting.

LEADERSHIP & CO-CURRICULAR

- **Competitive Programming:** Actively training on LeetCode and Codeforces, focusing on Linked Lists, Array manipulation, and Div. 2/3 contest problems.
- **Model United Nations (MUN) Club:** Active member engaging in diplomatic simulations to strengthen public speaking and negotiation skills.
- **Toastmasters International:** Practiced structured communication and impromptu speaking to clearly explain complex technical concepts.
